I'm a driven front-end developer and software engineering graduate from the University of Greenwich. I specialize in front-end web development but I have experience working with a variety of technologies as well, such as: Java and Python. I am also accustomed to agile practices in the workplace and communicating technical aspects of a task in a way that all can understand. I look to deliver the best quality work and I'm not afraid to take on new responsibilities outside of my day-to-day ones.

Technical Skills:
HTML, CSS, JavaScript, SASS, React, Git, Photoshop, NodeJS, ExpressJS

EDUCATION

Bachelor of Engineering (B.E.) - Software Engineering   Sep 2018 - May 2021
University of Greenwich, London
Grade: First Class Honours (1:1)
- Completed Oracle Mentorship Programme 2019/2020

Computing & I.T   Sep 2015 - Jun 2018
New City College, London
Grade: Double Distinction*

EXPERIENCE

Deputy Lead Junior Front-End Developer   Jul 2022 - Aug 2022
Zustech, Remote (Contract)
Alongside my usual responsibilities as a junior front-end developer, I took on some additional ones by taking on the role of deputy junior lead for the front-end team.

- Stood in for the lead developer during meetings if they were unavailable.
- Participated in refinement sessions and more detailed discussions regarding sprint goals that concern the front-end side of the application.
- Provided feedback on the feasibility and appearance of designs created by the UI/UX team.
- Helped onboard new developers to the team by helping them set up the code base for their device, showed them how to use AWS CodeCommit (Git) and answered any questions they had.
- Occasionally ran the spring planning session.

Junior Front-End Developer   Feb 2022 - Aug 2022
Zustech, Remote (Contract)
Developed the front-end of a learning management system by working with other teams and developers, all while following the scrum framework to add structure and organization to the development process.

- Fetched and implemented REST API endpoints created by the back-end team and added functionality to the web application using React, JavaScript, SASS and Axios.
- Discussed and implemented designs created by the UI/UX team using ReactJS and SASS.
- Worked as part of a scrum team, following the agile methodology consisting of 2 week sprints for continuous integration.
- Used tools such as Jira, Git and MS Teams to collaborate with colleagues.
