London, UK | 07853337756 | [LinkedIn](#) | domstaswork@gmail.com

I am a results-driven front-end developer who enjoys challenging work. I have just under 3 years of professional experience and am a first-class software engineering graduate based in London, UK. I always look to deliver the best quality work possible and I'm not afraid to take on new responsibilities outside of my day-to-day ones.

Technical Skills: JavaScript, TypeScript, React, Redux, Node, Express, PostgreSQL, Playwright, Jest, HTML, CSS, SASS, Ant Design, Tailwind, Git. **Exposure to:** NextJS, Python, TensorFlow, Java, Angular, AWS, Solidity, Move.

EXPERIENCE

Front-End Developer   *Apr 2023 - Jan 2025*
Williams Lea, Remote (Full-Time)
Played an integral role in developing and maintaining multiple "Engage AI" products and services, a collection of applications including Microsoft plug-ins, web applications utilizing AI systems and more.
- Led and supported the front-end development for multiple applications simultaneously using React and TypeScript.
- Led product demo sessions with senior leadership team and key stakeholders.
- Developed and amended custom complex algorithms in the front-end to meet requirements, which resulted in new client acquisition for the company.
- Created and assessed wireframe designs to ensure feasibility, pixel-perfect aesthetics and optimal UX based on requirements.
- Entrusted to develop the front-end for a new project from scratch, which has
- Collaborated with back-end teams to design and integrate endpoints into the front-end.
- Assisted in the refactorization process for certain products. the potential to be used by an estimated 80,000+ users once made live.
- Led knowledge-transfer sessions and created documentation to help new developers get started.
- Worked as part of a scrum team, consisting of 2 week sprints and review sessions.

Front-End Developer   *Jan 2023 - Mar 2023*
Saurus, London, UK (Contract)
Assisted in developing the front-end and applying solutions for a client; a luxurious casino club known as "les ambassadeurs". They partnered with Saurus to build out a web application for their new business venture and to integrate Saurus' anti-fraud technology into their payment system.
- Implemented designs, functionality and features into client's web application using Angular, TypeScript/JavaScript and SASS.
- Fetched and implemented multiple end-points from the back-end using Angular.
- Assisted with manual testing and review of new features before they are added to production.
- Used tools such as Jira, Git and Slack to collaborate with colleagues.

Junior Front-End Developer   *Feb 2022 - Aug 2022*
Zustech, Remote (Contract)
Developed the front-end of a learning management system by working with other teams and developers, all while following the scrum framework to add structure and organization.
- Implemented endpoints made by the back-end team using React.
- Discussed and implemented designs created by the UI/UX team.
- Worked as part of a scrum team, following the agile methodology consisting of 2 week sprints.
- Stood in for the lead developer during meetings if they were unavailable.
